		the other does not, then the dock system which is able to achieve the performance standard set for it would be eligible for the automatic annual indexation. In case any Dock System achieves the benchmark for any one for more than one activity but is not able to achieve the performance standard set for other activities, the concerned dock system would be eligible for the automatic annual indexation of the activity against which it is able to achieve the performance benchmark.
	(b)	The port should declare the Performance Standards achieved by it annually for the period 1 January to 31 December vis-à-vis the Performance Standards notified by the Authority at the level committed by the port within one month of end of the calendar year to the concerned users as well as to the Authority. Penalty / Incentive Norms:

For the purpose of calculation of the productivity, the working time of the vessel will be calculated from haul in time till completion of cargo work. For failure or success in achieving the stipulated discharge rate, penalty/ incentive will be applicable asfollows:

- (a) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms by 2 hours or less, then no penalty will belevied
- (b) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms beyond 2 hours, then penalty will be levied @ 2 times of the normal berth hire charge for every additional hours or part thereof taken to complete the cargo operations of thevessel.
- (c) If the vessel's pumping rate exceeds the Benchmark Pumping rate, then incentive will be provided as per thefollowing:

If the working time of the vessel (considering hauled in time till completion of cargo work) is lower than the stipulated time by more than 2 hours, then incentive will be paid @ 5% of the applicable berth hire charges for every additional hour saved. However, there will be no incentive for saving of time up to 2 hours.

Note to provisions regarding Penalty/ Incentive Norms:

- (i) For calculation of the stipulated working period in hours the cargo tonnage will be divided by the Pumping Rate Norms and the same will be compared with the actual working period of the ship to be ascertained from the operational records.
- (ii) For non-achievement of the performance as stated at (i) above, the penalty will be imposed on the ship's owner / agent. Similarly, for achieving higher performance, the incentive will be paid at the proposed rate to the ship owner/agent.
- (iii) If Propane & Butane are discharged simultaneously even for a smaller period, the benchmark pumping rate prescribed for **Simultaneous discharge of Butane & Propane** would be applicable for calculating penalty / incentives. However, for discharging Propane & Butane or some other cargoes one by one, hauled in time to finished work time of the first cargo and finished work time of 1st cargo to finished work of 2nd cargo is to be considered for calculating penalty/incentives. More so, in case of simultaneous discharge of cargo other than Propane & Butane, duration from Hauled in Time to Finished Work Time(forthe1stcargo)andFinishedWorkTimeof1st/previouscargotoFinishedWork Time (for 2nd cargo) is to be considered.
- S.21.5.2 Due to non-achieving of benchmark Pumping Rate or any other reason attributable to the vessel, if the sailing of the Vessel is delayed and consequently a vessel called from Sand head /anchorage point for berthing in place of the vessel so delayed is required to be sent back to Sandhead /anchorage; the pilotage/shifting charge for the said movement of the incoming vessels shall be recovered from the vessel which overstayed at Berth.
- S.21.6 Performance norm based incentive / penalty for conventional berths using ship's gears, in respect of dry bulk cargo handled at Haldia Dock Complex (HDC).
