

## NOTICE

The limits of handling Hazardous cargo in Kolkata Port have been revised as follows:-

1. Category I [Flash Point less than (+) 23°C] -----500 MT
2. Category II [Flash Point (+) 23°C to (+) 65°C]-----2000MT

Subject to the following conditions:-

- a) Only one container to be handled at the quay side at a time both for import/export.
- b) The container after unloading should be removed directly out of the dock or to the CFS having appropriate facilities to store such cargo. The Container/Vessel Agent shall be responsible for removal of the containers from the Port & storage at any off-dock CFS having appropriate facility.
- c) Both the importer/exporter and the agent of the vessel shall submit a bond to indemnify KoPT against any of its losses and also against all third party liabilities arising out of the said operation.
- d) The party should comply with the stipulated safety measures.
- e) The importer/exporter must comply with the order of the West Bengal Pollution Control Board dated 25.02.2016.
